## Proven Ability

A letter to the citizens of District 1, Waverley-Fall River-Musquodoboit Valley.  
June 27th, 2016

Neighbours, friends and residents:

I am writing you today to re-introduce myself and let you know that I have decided to offer my name as a candidate for the position of Halifax Regional Councillor here in District 1, Waverley-Fall River-Musquodoboit Valley.

As a local businessman and a former councillor, I returned to the private sector four years ago. Since that time, I have focused on my family and the management of our family company here in Atlantic Canada. Employing many local people and creating opportunities. Now, I am in a position to step back from daily business activities making way for the next generation.

During my time away from elected office, I have remained active in the District. Gaining knowledge through communication, listening to your concerns and supporting issues that are important to all of us.

With a fresh perspective and a positive outlook, combined with over 25 years business experience, including 13 years as a former member of council, I am prepared to be your new councillor here in District 1, offering strong, effective representation at Halifax City Hall.

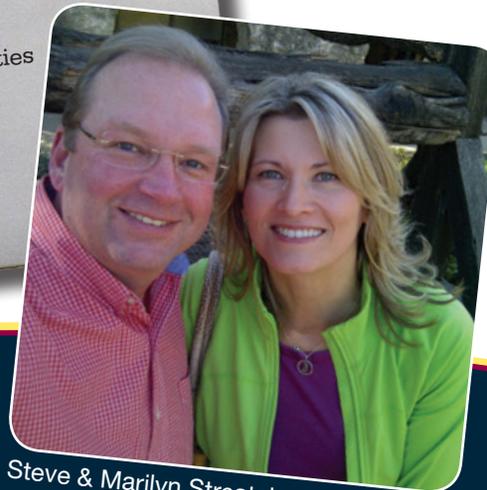

I believe these are very important times here in HRM. With the recent exodus of several top level staff members, including the C.A.O., I feel the municipality is volatile and at risk of losing focus. With new federal funding, it will be imperative that priority be given to infrastructure projects that will benefit District 1. It is now time to return control of City Hall to the people, you the taxpayers.

I know how government works and how to get results. With a solid track record, a common sense approach and a **proven ability**, I will continue to consult with residents and be a full time councillor.

I will provide effective leadership, both locally in our communities and as your voice at City Hall.

On October 15th, I respectfully ask for your support.

*Steve Streach*

Steve & Marilyn Streach

### Steve's Priorities:

- **Full Time Councillor**, working in the District, bringing people together and offering direct communication with residents by regular newsletters.
- **Lower Taxes**, smaller government, greater control on spending and less red tape.
- **Supporting Seniors**, on housing issues, tax rebate programs and accessibility for our community elders.
- **Leadership and Experience**, I will work hard for the residents of District 1. Raising our profile at City Hall and fighting for infrastructure funding for local projects, such as water, sidewalks, and transportation links.
- **Fire Protection and Police Services**, reducing crime and increasing public safety by ensuring our officers, firefighters and volunteers have the tools, training and financial support needed.
- **Environment and Recreation**, supporting youth recreation programs throughout the District. Consideration of the impact government decisions have on our local environment, including lakes, waterways, quarries and mining.
- **Economic Development and Job Creation**, I will support local industry and small business by working to reduce the impact of the HRM business tax and ensuring publicly funded organizations such as the Greater Halifax Partnership, fulfill their mandate. Helping to create job opportunities for residents and our youth.
- **Social Programs**, working to improve our social safety net and continuing to ensure help and support is available to those in our community who need it the most.
